FOR IMMEDIATE RELEASE

Talage Successfully Completes SOC2, Type II Audit

RENO, Nev. July 28, 2022 – [Talage](#), a Submissions Management Platform (or SMP) for commercial insurance, today announced that they have successfully completed a System and Organization Controls (SOC) 2 Type II audit, performed by [Sensiba San Filippo, LLP](#) (SSF).

Developed by the American Institute of Certified Public Accountants (AICPA), the SOC 2 information security standard is an audit report on the examination of controls relevant to the trust services criteria categories covering security, availability, processing integrity, confidentiality, and privacy.

"Talage is committed to providing a secure environment for our customers and successful completion of this audit shows that," said Adam Kiefer, CEO, and co-founder of Talage. "Having successfully completed the audit will make it easier to work with new insurers and other customers who require tougher security."

A SOC 2 Type II report describes a service organization's systems and whether the design of specified controls meets the relevant trust services categories and assesses the effectiveness of those controls over a specified period of time. Talage's SOC 2 Type II report did not have any noted exceptions and therefore was issued with a "clean" audit opinion from SSF.
